Attorneys for Plaintiffs
 LAVON GODFREY and GARY GILBERT

SUPERIOR COURT OF THE STATE OF CALIFORNIA
 IN AND FOR THE COUNTY OF ALAMEDA

LAVON GODFREY and GARY GILBERT,
 on behalf of themselves and all others
 similarly situated,

Plaintiffs,

v.

OAKLAND PORT SERVICES CORP. d/b/a
 AB Trucking, and DOES 1 through 20,
 inclusive,

Defendants.

Case No. RG08379099

[PROPOSED] STATEMENT OF DECISION AND JUDGMENT

Trial Dates: February 14-22, 2012
 March 12, 2012

Dept.: 20
 Judge: Hon. Robert B. Freedman

ORIGINAL

FILED

1 **I. FACTUAL AND PROCEDURAL BACKGROUND**

2 **A. Procedural posture**

3 Plaintiffs Lavon Godfrey and Gary Gilbert, on behalf of themselves and the Class
4 (“Plaintiffs”) against AB Trucking (“AB”)¹ filed Complaint in this wage and hour class action suit
5 in March 2008. The operative Second Amended Complaint was filed on September 20, 2010
6 (“SAC”). The suit alleged violations of the California Labor Code (“Labor Code”) and Unfair
7 Business Practices (Business & Professions Code §§17200, et seq., “UCL”) containing eight
8 causes of action: 1) Unfair Business Practices (Business & Professions Code §§17200, et seq.,
9 “UCL”); 2) Failure to Pay for All Hours Worked (Labor Code §§510, 1182.12, and 1194; IWC²
10 Wage Order No. 9, §4); 3) Failure to Pay for Any Hours Worked Due to Misclassification of
11 Employment Status (Labor Code §§510, 1182.12 and 1194; IWC Wage Order No. 9, §4; 4)
12 Failure to Pay Overtime (Labor Code §§510 and 1194; IWC Wage Order No. 9, §3); 5) Failure to
13 Pay Living Wage (Oakland City Charter §728) (“OLW”); 6) Failure to Provide Meal and/or Rest
14 Periods (Labor Code §§226.7 and 512; IWC Wage Order No. 9); 7) Failure to Pay Wages Owing
15 at Discharge or Quitting (Labor Code §§201, 202 and 203); and 8) Failure to Provide Accurate
16 Itemized Wage Statements (Labor Code §226). The fourth cause of action for failure to pay
17 overtime was dismissed by Plaintiffs during trial, leaving seven causes of action and eliminating
18 the need for the Overtime Subclass.

19 Plaintiffs are truck driver employees of AB who primarily drove trucks owed by their
20 employer back and forth to the Port of Oakland from AB’s yard located in the general Port Area.
21 Drivers also drove loads to customer locations in the greater San Francisco Bay Area, and, on
22 occasion, to locations throughout California.

23 The Court certified the following Class in December 2010 of drivers (“Drivers” or
24 “Class”):
25
26

27 ¹ Reference herein to AB encompasses Oakland Port Services (“OPS”) and Baymodal.

28 ² “IWC” refers to the California Industrial Welfare Commission.

1 All drivers who performed work for Defendant out of its Oakland,
2 California facility from the period of March 28, 2004 through the
3 date of notice to the class [March 15, 2011] ("statutory period").

4 After completion of discovery and mediation that proved unsuccessful, the action was
5 tried to the Court over several days in February 2012. On October 2, 2012, this Court issued its
6 Notice of Intended Decision and Order ("NOID"). On October 12, 2012, AB filed a request for
7 Statement of Decision. On November 2, 2012, Plaintiffs filed the first Proposed Statement of
8 Decision.

9 On November 13, 2012, AB filed Objections to the Proposed Statement of Decision. On
10 April 8, 2013, this Court issued its Order regarding Statement of Decision, Proposed Judgment
11 and Claims Administration Issues. The parties appeared before the Court on May 10, 2013.

12 **B. FACTS IN EVIDENCE**

13 The Court will discuss the facts in evidence pertaining to causes of action two through
14 three, and five. The other causes of action were either dismissed by Plaintiffs (fourth cause of
15 action), or will be discussed later herein as the claims are derivative of other violations (first,
16 seventh and eighth causes of action).

17 **1. Failure to pay for all hours worked**

18 Drivers testified they worked more than eight hours in a day, and at times AB
19 management required drivers to clean AB's yard on weekends, holidays, or at other times when
20 business was slow.³ Drivers testified they typically worked more than eight hours each day, but
21 that they were typically only paid for eight hours each day.

22 AB automatically deducted one hour's pay from each driver per each shift worked
23 according to AB's designated person most qualified ("PMQ") on payroll and payroll processing,
24 Maria Jovita (Jovi) Aboudi. Any time a driver worked over five hours in a day, there was always
25 a deduction of one hour applied. The documentary evidence presented also reflected, on its face,
26 deductions of one hour per each driver, per each shift of five hours or more worked, each day.
27 No documentary evidence produced by AB reflected that the automatic one-hour deduction ever
28 ceased.

³ At trial, eight drivers provided testimony: six Class members, including Plaintiffs Godfrey and Gilbert, as well as two drivers who had chosen to opt-out of the Class.

1 AB alleged that the one-hour automatic deduction, and thus failure to pay at least
2 minimum wage, was made because drivers received a one-hour, off-duty meal period. However,
3 AB did not produce records of meal periods, pursuant to the applicable wage order, Industrial
4 Welfare Commission Wage Order No. 9-2001 ("Wage Order 9"), subsection 7, that would have
5 supported its position. AB offered no documentary evidence at trial showing meal periods
6 received by drivers at any time during the statutory period.

7 Though there was no showing at trial that the automatic deduction of one hour ceased or
8 changed in any way, there was some indication that AB made a change to its record-keeping
9 policies after the filing of the lawsuit. But again, notwithstanding some indication of this in
10 testimony, AB did not produce records of meal periods recorded (or received) by drivers for any
11 time during the statutory period.

12 The evidence reflects that prior to May 2009, drivers did not receive one-hour,
13 uninterrupted, off-duty meal period after every five hours worked (or at all). Post-May 2009,
14 there is some evidence that drivers received at least 30-minute meal periods (if not one hour meal
15 periods) when it was not "busy." However, despite these described changes to instruction or
16 general awareness regarding meal periods, no evidence reflected AB ceased its automatic
17 deduction policy and practice, nor that AB ceased discouraging or preventing drivers from
18 receiving meal periods. Drivers were regularly paid for eight hours, though they had worked
19 more than eight hours.

20 **2. Failure to pay for any hours worked due to misclassification**

21 AB misclassified drivers who were suffered or permitted to work as non-employees, or
22 unpaid "trainees." Both AB's President, Bill Aboudi, and AB's PMQ admitted there was a
23 subclass of drivers classified as non-employee trainees who were not paid at all for any hours
24 worked. The payroll and timekeeping records confirmed AB had trainees who were not paid at
25 all for any hours worked. Misclassified trainees were both those with Class A licenses at the time
26 they worked for AB, but were not paid, and those without Class A licenses.

1 3. OLW

2 Evidence was presented as to the number of drivers employed by AB during the statutory
3 period. Evidence was also presented as to the wage rates earned by drivers during the statutory
4 period. While many of the drivers received wages at a rate lower than that required by the OLW,
5 as is discussed below, the record reflects insufficient evidence to support a finding that AB
6 employed the requisite number of employees to be covered by OLW requirements.

7 4. Meal periods and rest breaks

8 Class member witnesses testified that no one at AB told them to take a half hour,
9 uninterrupted, off-duty meal period, at least not until in mid-2009 when the dispatcher first
10 indicated to them on single, isolated occasions that they should take a one hour lunch break.⁴
11 Drivers testified that before 2009, though they were able to stop briefly (5-20 minutes at a time)
12 to “grab” food, they were not allowed to take a lunch break and had to eat in the truck in line at
13 the Port while turning the motor of their assigned vehicle on and off. After 2009, drivers were
14 told to take a lunch break when it was not busy, but were often told it was “too late” in the shift to
15 take a lunch. Both prior to 2009 and after, drivers presented evidence they were prevented from
16 taking meal period because they were continuously dispatched.

17 Drivers were also prevented from taking meal periods because they could not leave their
18 trucks when the line into the Port was not moving. Drivers were prevented from getting out of
19 the line to pull over and eat because this would cause them to lose their place in line, in addition
20 to the fact that there was no legal or safe area in which to to pull over.

21 Drivers were not told by AB to take rest breaks. Instead, drivers provided examples of
22 when they had been interrupted when attempting to take a break. Some drivers were encouraged
23 by AB to relieve themselves in a bottle, via a funnel in the case of one female driver, or a bucket,
24 in the case of another female driver, rather than take the time to stop to use the restroom. Another
25 driver testified she was chastised for taking a break to warm her food in the microwave kept in
26 AB’s office area.

27 _____
28 ⁴ The year 2009 is post-filing of the instant action, which was brought in March 2008.

1 In addition, when drivers arrived at a customer location, they would often have to wait
2 until their truck could be unloaded, and while the truck was being unloaded. This waiting
3 requirement affected both their ability to take meal and rest periods.

4 Drivers never recorded taking a meal period, nor were they asked to do so. No evidence
5 of recorded meal periods was provided. Drivers testified that they were never paid an hour of pay
6 at their regular wage rate for having missed a meal period or a rest break. AB produced no
7 evidence to the contrary.

8 II. DISCUSSION

9 A. FAILURE TO PAY FOR ALL HOURS WORKED

10 Wage Order 9, subsection (4)(B) provides: "Every employer shall pay to each employee,
11 on the established payday for the period involved, not less than the applicable minimum wage *for*
12 *all hours worked* in the payroll period, whether the remuneration is measured by time, piece,
13 commission, or otherwise [emphasis added]." (See *Armenta v. Osmose, Inc.* (2005) 135
14 Cal.App.4th 314, 323-4.) Wage Order 9, subsection (2)(H) defines "hours worked" as "the time
15 during which an employee is subject to the control of an employer, and includes all the time the
16 employee is suffered or permitted to work, whether or not required to do so." (See *Morillion v.*
17 *Royal Packing* (2000) 22 Cal.4th 575, 582.) "The "suffered or permitted to work" language does
18 not limit whether time spent "subject to the control of an employer" is compensable." (*Id.*; see
19 e.g., *Martinez v. Combs* ("*Martinez*") (2010) 49 Cal.4th 35, 69.)

20 Based on the testimony of AB's PMQ, the documentary evidence and testimony of
21 drivers, AB consistently failed to pay for all hours worked because it deducted one hour per day
22 from each employee. This deduction took place, even though the driver did not receive a one
23 hour meal period. As a result of AB's default practice and policy of automatically deducting one
24 hour's pay from each driver per each shift worked, drivers worked an hour each day for which
25 they were not paid.

26 B. FAILURE TO PAY EMPLOYEES CLASSIFIED AS TRAINEES

27 Wage Order 9, subsection (4)(B) applies to this claim as well as the all hours worked
28 claim. (See also *Morillion*, 22 Cal.4th at p. 582; *Martinez*, 49 Cal.4th at p. 69.) In addition,

1 several sections of the Labor Code prohibit the waiver of wage claims or payment at any rate less
2 than the minimum wage. (See e.g., Labor Code §§ 206.5, 219, 1194, 2802, 2804.)

3 The Class presented compelling evidence as to this claim. The evidence reflected that AB
4 misclassified drivers who were suffered or permitted to work as non-employees, or unpaid
5 "trainees." AB's witnesses admitted there were drivers classified as non-employee trainees who
6 were not paid at all for any hours worked. AB did not dispute its use of "trainees" during the
7 statutory period, nor that it utilized trainees who were unpaid. The evidence reflected these
8 trainees were suffered or permitted work by AB and were not paid at all. Thirteen identifiable
9 individuals were classified as "trainees" and were not paid. These individuals were identified
10 from the record and documents produced by AB.

11 C. CLAIMS UNDER THE OLW LAW

12 Although AB meets some of the criteria for a Port Assisted Business within the meaning
13 of the OLW (Section 728 of the Oakland City Charter), the Court concludes that AB did not
14 employ the requisite number of employees during the applicable period of January 28, 2005
15 through February 10, 2006, and thus the OLW is not applicable to quantifying the recovery to
16 which the Class is otherwise entitled.

17 D. MEAL PERIODS AND REST BREAKS

18 1. Meal periods

19 Labor Code section 512 requires an employee be provided one thirty-minute meal period
20 in the first 5 hours of work and a second thirty-minute meal period if the employee works more
21 than 10 hours in a shift. Under the terms of Section 512, an employee may consent to waiver of
22 the second meal period but may not consent to waive his second meal period if he waived the first
23 meal period.

24 Labor Code section 226.7(b) states, "If an employer fails to provide an employee a meal
25 period ... in accordance with an applicable order of the Industrial Welfare Commission, the
26 employer shall pay the employee one additional hour of pay at the employee's regular rate of
27 compensation for each work day that the meal ... period is not provided." Wage Order 9 states,
28 "No employer shall employ any person for a work period of more than five (5) hours without a

1 meal period of not less than 30 minutes....” (Cal. Code Regs., tit. 8, § 11090, subd. 11(A).)
2 “Employ,” under the wage order, means “to engage, suffer, or permit to work.” (*Id.*, subd. 2(E).)
3 An employer who suffers or permits an employee to work over 5 hours without a meal period (or
4 valid waiver thereof) may be liable under the statute for an additional hour of pay at the
5 employee’s regular rate of compensation. The California Supreme Court has “repeatedly
6 enforced definitional provisions the IWC has deemed necessary ... to make its wage orders
7 effective, to ensure that wages are actually received, and to prevent evasion and subterfuge.
8 [Citation.]” (*Martinez, supra*, 49 Cal.4th at pp. 61-62.)

9 The Class presented substantial and persuasive evidence that class members were
10 routinely and consistently precluded by AB from taking meal periods and rest breaks. Under the
11 California Supreme Court’s decision in *Brinker v. Superior Court* (“*Brinker*”) (2012) 53 Cal.4th
12 1004, AB failed to comply with its obligation to afford drivers meal periods because *Brinker*
13 holds an employer’s duty “is an obligation to provide a meal period to its employees.⁵ The
14 employer satisfies this obligation if it relieves its employees of all duty, relinquishes control over
15 their activities and permits them a reasonable opportunity to take an uninterrupted 30-minute
16 break, and does not impede or discourage them from doing so.” (See *Id.* at p. 1040.) An
17 employer does not satisfy its obligation if it “impedes” or “discourages” employees from taking
18 an “uninterrupted 30-minute break.” (*Id.*) An employer may not undermine a formal policy of
19 providing meal breaks by pressuring employees to perform their duties in ways that omit breaks.
20 (*Cicairos v. Summit Logistics, Inc.* (2005) 133 Cal.App.4th 949, 962-963; see also *Jaimez v.*
21 *Daiohs USA, Inc.* (2010) 181 Cal.App.4th 1286, 1304-1305 [proof of common scheduling policy
22 that made taking breaks extremely difficult would show violation].)

23 The recent *Brinker* decision provides two examples of unlawful discouragement—a
24 scheduling policy that makes taking breaks “extremely difficult” and creating an anti-meal-break
25 policy enforced through ridicule or reprimand. The Class established both unlawful scenarios
26 exist here. (See *Brinker, supra*, at p. 1040; concurrence at p. 1053 and ft. 1.)

27
28 ⁵ (See also *Faulkinbury v. Boyd and Associates, Inc.* (May 10, 2013), No. G041702, Slip Op.)

1 An employer may not undermine a formal policy of providing meal
2 breaks by pressuring employees to perform their duties in ways that
3 omit breaks. ([Citation].) The wage orders and governing statute do
4 not countenance an employer's exerting coercion against the taking
of, creating incentives to forego, or otherwise encouraging the
skipping of legally protected breaks.

5 (*Brinker*, 53 Cal.4th at p. 1040.)

6 In addition, the evidence shows AB neither maintained, nor provided drivers, any
7 "formal" meal period policy. The first example of unlawful discouragement provided in *Brinker*
8 presumes the existence of a formal meal period policy. AB does not meet the "provide" standard
9 because it provided no evidence showing drivers were, at a minimum, informed in any
10 meaningful or consistent way that they could take a meal period, or the definition of any such
11 meal period. As AB had no meal period policy to "undermine," and the evidence presented
12 shows that, beyond that, AB regularly discouraged the taking of legally protected breaks, AB has
13 not shown it provided meal periods to the Class.

14 The evidence reflects AB knew drivers were stuck in line to enter the Port, once inside the
15 Port, and in order to exit the Port, every single day. Yet it did not provide for the relief of its
16 employees' duties during this "waiting" time. Waiting, even in a comfortable location, is "on-
17 duty" by definition: here, drivers were waiting to complete a task assigned by their employer.
18 (See *Morillion, supra*, 22 Cal.4th at p. 582.) While waiting to complete an assigned task, drivers
19 were not free to leave to engage in personal activities. (See *Brinker*, at p. 1040; concurrence at p.
20 1053 and ft. 1.) Instead, AB discouraged off-duty meal periods, and instructed drivers to eat
21 while in line and "on duty."

22 Despite evidence drivers did not receive meal periods as required by law, AB presented no
23 evidence that it created or entered into written agreements between AB and drivers for on-the-job
24 paid meal periods. AB's PMQ on payroll and payroll processing admitted that AB automatically
25 deducted one hour's pay from each driver per each shift worked based on a presumption that one
26 hour meal periods were taken.

1 a. AB's argument that an employer need not record meal periods
2 after *Brinker* is not supported by legal authority

3 AB argued that the holding in *Brinker* places the responsibility of accurately recording
4 meal periods on the "employee," challenging the Court's reliance on Wage Order 9, subsection 7,
5 which requires "every employer" to keep "[t]ime records showing when the employee begins and
6 ends each work period. Meal periods, split shift intervals and total daily hours worked shall also
7 be recorded." Nothing in *Brinker*, however, overrules the obligation imposed by Wage Order 9,
8 subsection 7.⁶

9 Where an employer fails to keep records of hours worked, employees may establish the
10 hours worked solely by their testimony, and the burden of overcoming such testimony shifts to
11 the employer. (*Hernandez v. Mendoza* (1988) 199 Cal.App.3d 721, 727; see also Wage Order
12 9(7).) AB's argument that employees are foreclosed from recovering on a claim for a meal period
13 not provided because the employee failed to accurately record the time they began and ended
14 each meal period each day—when the employer provides no place to record a meal period nor
15 asks the employee to do so—is not supported by legal authority.

16 2. Rest breaks

17 The evidence further reflected that drivers were not provided with paid rest breaks as
18 required under Wage Order 9. (See Cal. Code Regs., tit. 8, § 11090, subd. 12(A).) Wage Order 9
19

20
21 ⁶ Indeed, the concurrence in *Brinker* arrives at the fully opposite conclusion:

22 Employers ... have an obligation both to relieve their employees for at least one meal
23 period for shifts over five hours ... and to record having done so ... (Citations.). If an
24 employer's records show no meal period for a given shift over five hours, a rebuttable
25 presumption arises that the employee was not relieved of duty and no meal period was
26 provided. This is consistent with the policy underlying the meal period recording
requirement, which was inserted in the IWC's various wage orders to permit enforcement.
(See, e.g., IWC board for wage order No. 7-63 meeting mins. (Dec. 14-15, 1966) pp. 4-5
[rejecting proposal to eliminate the meal period recording requirement because "without
the recording of all in-and-out time, including meal periods, the enforcement staff would
be unable to adequately investigate and enforce" a wage order's meal period provisions].)

27 (*Brinker*, 53 Cal.4th at p. 1053.) The *Brinker* concurrence goes further to explain that "[a]n employer's assertion that
28 it did relieve the employee of duty, but the employee waived the opportunity to have a work-free break, is ... an
affirmative defense, and thus the burden is on the employer, as the party asserting waiver, to plead and prove it." (*Id.*)

1 entitles each employee who works four hours, or each major fraction thereof, with a 10 minute on
2 the clock break. (*Murphy v. Kenneth Cole Productions, Inc.* (2007) 40 Cal.4th 1094, 1104
3 ["Pursuant to IWC wage orders, employees are entitled to ... a paid 10-minute rest period per
4 four hours of work."])). Drivers testified that AB did not authorize and permit ten minute rest
5 breaks. Moreover, the evidence reflected AB typically encouraged drivers not to take, or
6 prevented drivers from taking, rest breaks. AB provided no evidence of any formal policy on rest
7 breaks. As with meal periods, there is no indication drivers were, at a minimum, informed in any
8 meaningful or consistent way that they could take rest breaks, or the definition of any such rest
9 breaks.

10 Under the authority of *Brinker*, AB did not relieve class members of all duties during the
11 periods that rest or meal breaks could be taken.

12 E. DERIVATIVE CLAIMS

13 1. Unfair Competition Law

14 California Business & Professions Code section 17203, also known as the Unfair
15 Competition Law, provides that the Court may restore to any person in interest any money or
16 property which may have been acquired by means of such unfair competition and to which that
17 person or persons have an ownership interest. AB violated the UCL based on its violations of the
18 Labor Code discussed herein.⁷

19 2. Labor Code sections 201, 201, 203, and 226

20 Labor Code sections 201, 202 and 203 require an employer to pay all wages owed to an
21 employee at the time of separation of employment. The evidence reflects monies AB owed but
22 never paid for its failure to pay for all hours worked, any hours worked, meal and rest period
23 violations, and Labor Code section 226 violations.

24 Labor Code section 226 and Wage Order 9 require AB to provide accurate itemized wage
25 statements showing the correct number of hours worked, the applicable hourly rate for each hour
26 worked, and each category of compensation received, among other details. Plaintiffs proved they

27 ⁷ The UCL extends the liability period back for years from the date the Complaint was filed, or until March 28, 2004.
28 (See page 20, *infra*.)

1 suffered injury as a result of this violation because the incorrect number of hours worked set forth
2 on wage statements made it impossible for employees to calculate the wages to which they were
3 entitled. (*Price v. Starbucks Corp.* (2011) 192 Cal.App.4th 1136, 1143.)

4 AB had knowledge that drivers did not receive one hour, off-duty, uninterrupted meal
5 periods each day worked, yet AB deducted one hour each day from their pay. AB willfully paid
6 drivers less than they were owed and willfully provided wage statements reflecting false "hours
7 worked" as a result. AB knew it suffered and permitted trainees to work without paying these
8 trainee drivers (or providing them with wage statements) at all. Finally, AB also failed to provide
9 payment for missed meal and rest breaks on wage statements. The Class is entitled to recovery as
10 to this claim.

11 **F. AB' S AFFIRMATIVE DEFENSES**

12 The Court now addresses affirmative defenses raised by AB in its objections to the
13 Court's PSOD.

14 **1. AB holds the burden to overcome the presumption against preemption**
15 **of California's meal and rest break laws by FAAAA**

16 Congress enacted the Federal Aviation Administration Authorization Act ("FAAAA") in
17 1994 to prevent states from undermining federal deregulation of interstate trucking. (See
18 *American Trucking Ass'ns, Inc. v. City of Los Angeles* ("ATA") (2011) 660 F.3d 384, 395; see
19 also *Rowe v. N.H. Motor Transp. Ass'n* ("Rowe") (2008) 552 U.S. 364.) FAAAA provides in
20 pertinent part:

21 (c) Motor carriers of property.

22 (1) General Rule. Except as provided in paragraphs (2) and (3), a
23 State, political subdivision of a State, or political authority of 2 or
24 more States may not enact or enforce a law, regulation, or other
provision having the force and effect of law related to a price, route,
or service of any motor carrier . . . with respect to the transportation
of property.

25 (49 U.S.C. § 14501(c)(1).)

26 Preemption questions are approached with a presumption that "Congress did not intend to
27 pre-empt areas of traditional state regulation." (*Metropolitan Life Ins. Co. v. Massachusetts*

1 (1985) 471 U.S. 724, 740.) States possess broad authority under their police powers to regulate
2 the employment relationship to protect workers within the state. It is a traditional exercise of the
3 States' "police powers to protect the health and safety of their citizens," including child labor
4 laws, minimum wage laws, and laws affecting occupational health and safety. (*Hill v. Colo.*
5 (2000) 530 U.S. 703, 715 citing *Medtronic, Inc. v. Lohr* (1996) 518 U.S. 470, 475; *Day-Brite*
6 *Lighting, Inc. v. Missouri* (1952) 342 U.S. 421.) Because of this presumption against preemption,
7 courts may not interpret the FAAAA to preempt every traditional state regulation that might have
8 some indirect connection with, or relationship to, rates, routes, or services unless there is some
9 indication Congress intended that result. The Court finds, for reasons discussed herein, and based
10 on the facts presented at trial regarding the duties of the Class and AB's operations, in particular
11 that Congress did not intend preemption of California's meal and rest break laws.

12 The initial question in determining whether Section 14501(c)(1) of the FAAAA preempts
13 state action is whether the provision "relate[s] to a price, route or service of a motor carrier;" if
14 the answer is no, the provision does not fall within the preemptive scope of Section 14501(c)(1).
15 (*ATA*, 660 F.3d at p. 395.) In *Morales v. Trans World Airlines, Inc.* ("*Morales*") (1992) 504 U.S.
16 374, in also interpreting "relates to" language, the U.S. Supreme Court held the state law in
17 question was preempted by the Airline Deregulation Act ("*ADA*") because the law would have a
18 "significant impact" on the airlines' fares.⁸ (*Ibid.* at p. 389 [finding state promulgated guidelines
19 regarding airline fare advertising expressly preempted by *ADA*].)

20 In *Californians for Safe & Competitive Dump Truck Transportation v. Mendonca*
21 ("*Mendonca*") (9th Cir. 1998) 152 F.3d 1184, 1185, the Ninth Circuit found certain wage laws in
22 California qualified as state laws that had "no more than an indirect, remote, and tenuous effect
23 on motor carriers" and, as such, were not preempted by the FAAAA. (in original.) Thus, the
24

25 ⁸ The preemption language used in the *ADA* and the *FAAA* Act is essentially identical. The *ADA* was passed in
26 1978 and prohibits states from enforcing any law "relating to [air carriers] rates, routes, or services." 49 U.S.C.App.
27 § 1305(a)(1). The U.S. Supreme Court, comparing the identical "relating to" language to the language found in
28 *ERISA*, set forth the standard to identify "relating to" under the *ADA*: "State enforcement actions having a
connection with or reference to airline "rates, routes, or services" are pre-empted under 49 U.S.C.App. § 1305(a)(1)." (*Morales*, 504 U.S. at p. 384.) The test under the *ADA* is, thus, whether California's meal and rest break laws either
(1) have a connection to or (2) reference to rates, routes or services.

1 state wage laws did not meet the “relate to” standard. *Rowe* reaffirmed this principle that state
2 laws with only a tenuous, remote, or peripheral effect on prices, services, or routes are not
3 preempted by FAAAA. (*Rowe*, 552 U.S. at p. 995.)

4 If the provision at issue does not fall within the market participant doctrine⁹ and relates to
5 rates, routes, or services, then the court considers whether any of the FAAAA’s express
6 exemptions save the regulation from preemption. (*Id.* at pp. 395-6.)

7 **2. Background and legal standard**

8 **a. Federal precedent: pre-*Dilts***

9 In 1992, as discussed above, the U.S. Supreme Court decided *Morales* holding a state law
10 regarding advertising guidelines for airline fares preempted by the ADA because it would have a
11 “significant impact” on the airlines’ fares. In 1995, the U.S. Supreme Court held in *American*
12 *Airlines, Inc. v. Wolens* (1995) 513 U.S. 219, that claims for breach of contract and violations of
13 state consumer protection laws arising out of changes to a frequent flyer program were preempted
14 by the ADA as to the consumer protection law—but not as to common law remedies for breach of
15 contract. (*Ibid.* at 228-9.) In *Mendonca, supra*, the Ninth Circuit squarely held that the language
16 and structure of the FAAA Act does not evidence a clear and manifest intent on the part of
17 Congress to preempt California’s Prevailing Wage Law (Labor Code §§ 1770-80) (“CPWL”).
18 *Mendonca* held that, while CPWL “in a certain sense” is “related to” the employer’s “prices,
19 routes and services, we hold that the effect is no more than indirect, remote, and tenuous ... We

20 _____
21 ⁹ This doctrine is not applicable here as the state was not acting as a market participant in passing meal and rest break laws.

22 The Court, likewise, need not address the “safety exemption” to preemption by FAAAA on the facts of this case.
23 However, the Court notes it appears that California’s meal and rest break laws are regulations aimed at protecting and
24 benefitting workers and are part of a “remedial worker protection framework,” which would tend to place them under
25 the “safety exemption.” “[I]n light of the remedial nature of the legislative enactments authorizing the regulation of
26 wages, hours and working conditions for the protection and benefit of employees, the statutory provisions are to be
27 liberally construed with an eye to promoting such protection.” (See *Brinker, supra*, 53 Cal.4th at pp. 1026-27 citing
28 *Industrial Welfare Com. v. Superior Court* (1980) 27 Cal.3d 690, 702; *Murphy, supra*, 40 Cal.4th at pp. 1103, 1105,
1113 [“Employees denied their rest and meal periods face greater risk of work-related accidents and increased stress,
especially low-wage workers who often perform manual labor. Indeed health and safety considerations (rather than
purely economic injuries) are what motivated the IWC to adopt mandatory meal and rest periods in the first place.”].)
Particularly in the case of truck drivers, these laws protect not only workers, but the public. (See e.g., *Gentry v.*
Superior Court (2007) 42 Cal.4th 443, 456.)

1 do not believe that CPWL frustrates the purpose of deregulation by acutely interfering with the
2 forces of competition.” (*Mendonca*, 152 F.3d at pp. 1185, 1189.) The Court recognizes that
3 prevailing wage laws are not identical to meal and rest break laws. However, the reasons offered
4 by the employer (also of drivers) in *Mendonca* in support of preemption under the FAAA Act
5 were nearly identical to the concerns raised by *Dilts*, *infra*, yet, the Ninth Circuit came to the
6 opposite conclusion from the district court in *Dilts*.¹⁰ Also in 1998, the Ninth Circuit held in
7 *Charas v. Trans World Airlines, Inc.* (9th Cir. 1998) 160 F.3d 1259, that the ADA evidenced
8 congressional intent to “prohibit states from regulating airlines while preserving state tort
9 remedies that already existed at common law, providing that such remedies do not significantly
10 impact federal deregulation.” (*Ibid.* at p. 1265.)

11 In 2001 in *Air Transport Ass’n of Am. v. City & County of San Francisco*, the Ninth
12 Circuit held that a city Ordinance conditioning city contracts, including airport property lease
13 agreements, on the contractor’s promise not to discriminate on the basis of several protected
14 grounds including domestic partner status, was not preempted by the ADA. The court found the
15 promise not to discriminate extended to the provision of employment benefits to the domestic
16 partners of employees. (*Air Transport Ass’n of Am. v. City & County of San Francisco* (“*Air*
17 *Transport*”) (9th Cir. 2001) 266 F.3d 1064, 1068.) The airlines complained they would face an
18 increase in the cost of providing benefits to their employees’ domestic partners, and that would in
19 turn force the airlines to change their “routes” and “services.” (*Ibid.* at 1073.) The Ninth Circuit
20 reasoned that because “[t]he Airlines [conceded] that they will use airport property in San
21 Francisco regardless of the Ordinance ..., the Ordinance cannot be said to compel or bind the
22 Airlines to a particular route or service and there is no preemption under the connection-with
23 test.” (*ATA*, 660 F.3d at p. 397 citing *Air Transport*, 266 F.3d at pp. 1071-2.) The Ninth Circuit
24

25 ¹⁰ The employer in *Mendonca* argued that CPWL “increases its prices by 25%, causes it to utilize independent
26 owner-operators, and compels it to re-direct and re-route equipment to compensate for lost revenue. As proof of
27 these assertions, [employer] alleges that its rates for “services” are based on: (1) costs, including costs of labor,
28 permits, insurance, tax and license; (2) performance factors; and (3) conditions, including prevailing wage
requirements.” (*Mendonca*, *supra*, at p. 1189.) AB has not raised specific examples, as is discussed further below, of
how it might be compelled to re-direct or re-route, but the concerns raised—and dismissed—by the defendant in
Mendonca, including “cost of labor,” would likely be among the examples cited.

1 noted there might be some imaginable contract term the city could demand whose costs would be
2 so high that it would compel the airlines to change their “prices, routes, or services,” but it found
3 the Ordinance at issue did not approach that level even though providing additional employee
4 benefits would raise operating costs. (*Air Transport*, 266 F.3d at p. 1075.)

5
6 In 2011, in *ATA*, *supra*, the Ninth Circuit held that a state may condition access to state
7 property without preemption by FAAAA, so long as the conditions do not impose costs that
8 compel the carrier to change rates, routes, or services. The laws in question in *ATA* were
9 concession agreements imposed by the Port of Los Angeles. Under *ATA*, state laws do not per se
10 affect rates, routes, or services simply because they “impose conditions” on those operating in the
11 state. (See e.g., *ATA*, 660 F.3d at p. 398.) Imposing conditions does not amount to per se
12 “significant impact.”

13 Federal precedent interpreting FAAAA (or ADA) thus finds that common law contract
14 and tort claims are not preempted by the “relates to” language, though such claims would have an
15 indirect financial impact on motor carriers. Laws that make a direct substitution for competitive
16 market forces also do not withstand scrutiny. But, an imposition of conditions, such as a cost, on
17 the motor carrier—without “compelling” a change in rates, routes, or services—is insufficient to
18 constitute a “significant impact.” A state’s desire to implement prevailing wage laws was too
19 indirect, remote, or tenuous to be preempted.

20 **b. Federal precedent: *Dilts***

21 In *Dilts v. Penske Logistics LLC* (“*Dilts*”) (S.D. Cal. 2011) 819 F.Supp.2d 1109, a federal
22 district court found on the facts presented that while California’s meal and rest break laws did not
23 directly target the motor carrier industry, California’s “fairly rigid” meal and break requirements
24 impacted the types and lengths of routes that were feasible and reduced the amount of on-duty
25 work time allowable to drivers, thus reducing the amount and level of service the employer could
26 offer its customers without increasing its workforce and investment in equipment. (*Ibid.* at pp.
27 1117-1122.) *Dilts* is limited to its facts.¹¹ Under existing federal precedent, causing an increase

28 ¹¹ AB also cites *Esquivel v. Vistar Corp.* (C.D. Cal., Feb. 8, 2012, 2:11-CV-07284-JHN) 2012 WL 516094 in which a

1 in workforce or investment may constitute an imposition of conditions on AB, but as in *Air*
2 *Transport* and *Mendonca*, such an increase would not necessarily rise to the level of “significant
3 impact.” This Court is not inclined to follow the limited ruling in *Dilts*.

4 The court in *Dilts* found “[b]oth parties agree that the [California meal and rest break]
5 laws impact the number of routes each driver/installer may go on each day, and Plaintiffs do not
6 oppose Penske's argument that the laws impact the types of roads their drivers/installers may take
7 and the amount of time it takes them to reach their destination from the warehouse.” (*Dilts* at p.
8 1119.) The court in *Dilts*, thus, reached a conclusion of preemption under the facts it considered:
9 “... these ramifications of California's [meal and rest break] laws upon Penske's routes and
10 services all contribute to create a significant impact upon prices. Penske produces facts regarding
11 the cost of additional drivers, helpers, tractors, and trailers that would have been needed to ensure
12 off-duty breaks under California's rules and maintain the same level of service. [Citation.]” (*Id.*)
13 The court determined that while Penske did not show that the meal and rest break laws would
14 prevent them from serving certain markets, “the laws bind Penske to a schedule and frequency of
15 routes that ensures many off-duty breaks at specific times throughout the workday in such a way
16 that would interfere with ‘competitive market forces within the ... industry.’” (*Id.*) *Cardenas*,
17 *infra*, decided by a different federal district court in 2011, arrives at a different conclusion as
18 discussed below.

19 Here, AB presented no evidence of any imposed conditions or costs, let alone rising to the
20 level of creating a “significant impact” upon its prices. No showing was made regarding the
21 number of routes, cost of additional drivers, tractors, trailers, or other such factors that AB could
22 have claimed it would face should it have to comply with state law.¹² To the contrary, AB has
23 made no showing of interference with competitive market forces within the industry.

24
25 federal district court, relying entirely on *Dilts*, granted a Motion to Dismiss the Plaintiff's Second Amended
26 Complaint because the meal and rest period claims were “preempted” by the FAAAA. The district court in *Esquivel*
27 did not have any “facts” before it other than those plead in the complaint, yet it determined it could conclude that the
28 presumption against preemption was overcome and that the safety exemption to FAAAA did not apply. This Court
need not adopt this approach.

¹² AB does not address how numerous other trucking companies continue to operate in California, as well as in and
out of the Port of Oakland, every day seemingly without any problem of competitive advantage in the market.

1 c. California precedent

2 The trend in California law is against preemption by FAAAA of state meal and rest break
3 laws for employees governed by Wage Order 9. In *Fitz-Gerald v. Skywest, Inc.* (“*Fitz-Gerald*”)
4 (2007) 155 Cal.App.4th 411, the California appellate court found that actions to enforce
5 California’s minimum wage laws and labor laws governing meal and rest breaks are *not*
6 preempted by the ADA. The court rejected the defendant’s argument that the state’s laws resulted
7 in “higher fares, fewer routes, and less service” as too “tenuous.” *Fitz-Gerald*, 155 Cal.App.4th at
8 p. 423 n. 7.)¹³

9 Likewise, since 2000 when the most recent manifestations of California meal and rest
10 break laws took effect, numerous California courts have decided issues in meal and rest break
11 cases involving Wage Order 9 governing workers in the transportation industry—whether class
12 certification, summary judgment, or otherwise—yet, none have found preemption of those claims
13 by the FAAAA. (See e.g., *United Parcel Service, Inc. v. Superior Court* (2011) 196 Cal.App.4th
14 57 [holding that, as a matter of first impression, statute authorized separate premium payments for
15 failure to provide both meal periods and rest periods]; *Thurman v. Bayshore Transit Management,*
16 *Inc.* (2012) 203 Cal.App.4th 1112 [trial court properly declined to award maximum amount under
17 PAGA, but no FAAAA preemption discussion]; *Jaimez, supra*, 181 Cal.App.4th at p. 1299
18 [certifying class where Wage Order 9 applicable]; *Franco v. Athens Disposal Co., Inc.* (2009) 171
19 Cal.App.4th 1277 [Court of Appeal held class arbitration waiver was invalid with respect to
20 alleged meal and rest period violations in putative class action brought by trash truck driver
21 against former employer for meal and rest period violations]; *Ghazaryan v. Diva Limousine, Ltd.*
22 (2008) 169 Cal.App.4th 1524 [proposed class of all drivers employed by company was
23 ascertainable; sufficient community of interest existed for class certification; and class action was
24 the superior method for resolving the dispute.]; *Cicairos v. Summit Logistics, Inc., supra*, 133
25 Cal.App.4th 949 [Employer’s obligation under Labor Code and Wage Order 9 to provide truck
26 drivers with an adequate meal period was not satisfied by assuming that the meal periods were

27
28 ¹³ Preemption was found under the separate and distinct analysis of the Railway Labor Act.

1 taken, because employers have an affirmative obligation to ensure that workers are actually
2 relieved of all duty at such times, and employers also have a duty to record their employees' meal
3 periods.]; *Prince v. CLS Transportation, Inc.* (2004) 118 Cal.App.4th 1320, 1329 [reversing trial
4 court's order sustaining defendant's demurrer to class allegations in complaint as premature, court
5 observed that plaintiff had alleged "institutional practices by CLS that affected all of the members
6 of the potential class in the same manner, and it appears from the complaint that all liability issues
7 can be determined on a class-wide basis."].)

8 As the preemption argument is jurisdictional, California courts have possessed the
9 authority to raise the issue independent of any argument made by the involved parties. (See, e.g.,
10 *Porter v. United Services Automobile Assn.* (2001) 90 Cal.App.4th 837, 838, ["We have the duty
11 to raise issues concerning our jurisdiction on our own motion"]; see also *Thomas v. Basham*, 931
12 F.2d 521, 523 (8th Cir.1991) [stating that federal courts shall raise jurisdictional issues *sua sponte*
13 when there is an indication that jurisdiction is lacking, even if the parties concede the issue].)
14 Yet, no California court has raised the issue, nor held California's meal and rest break laws
15 preempted by FAAAA.¹⁴

16 Indeed, the California legislature, aware of federal law governing motor carriers, chose to
17 create an exemption in 2002 to Wage Order 9 with regard to overtime.¹⁵ When the defendant in
18 *Cicairos* argued this 2002 amendment exempted it from the entirety of the Wage Order, the Court
19 of Appeals in 2005 found the defendant's "strained argument" failed. (See *Cicairos*, 133 Cal.
20 App. 4th at p. 959.) Thus, throughout the entirety of the period in which the California legislature
21 considered federal law and accordingly amended Wage Order 9, and the Court of Appeals
22 considered Wage Order 9 in *Cicairos*, the FAAAA had existed for years—since 1994. If the
23

24 ¹⁴ The California Supreme Court granted review of *People ex rel. Harris v. Pac Anchor Transp., Inc.* ("Pac
25 Anchor") (2011) 195 Cal.App.4th 765 on August 10, 2011 to determine the question of whether California's UCL
law is preempted by FAAAA. There are no meal and rest break claims at issue in *Pac Anchor*.

26 ¹⁵ Wage Order 9 subsection (3)(L), regarding overtime, was amended by the legislature in 2002 to provide: "The
27 provisions of this section are not applicable to employees whose hours of service are regulated by: (1) The United
28 States Department of Transportation Code of Federal Regulations, Title 49, Sections 395.1 to 395.13, Hours of
Service of Drivers; or (2) Title 13 of the California Code of Regulations, subchapter 6.5, Section 1200 and the
following sections, regulating hours of drivers." (Cal. Code Regs. tit. 8, § 11090.)

1 California legislature believed it was necessary to provide an exemption in the Wage Order in
2 response to FAAAA, as it did in 2002 with regard to an overtime exemption for motor carriers, it
3 would have done so. (*Id.*)

4
5 **3. AB made no showing of “significant impact” on its rates, routes, or**
6 **services**

7 In determining whether a provision has a connection to rates, routes, or services, the Court
8 examines the actual or likely effect of a state’s action. (See *ATA*, 660 F.3d at p. 396.) In
9 *Cardenas v. McLane FoodServices, Inc.* (“*Cardenas*”) (2011) 796 F.Supp.2d 1246, 1255-56, a
10 federal district court, without reaching a conclusion on the ultimate question of preemption,
11 summarized the law in the area finding that the relevant cases clearly suggest a conclusion that,
12 like other California wage laws, California's rest and meal break laws are not preempted under the
13 FAAAA.¹⁶

14 In *Cardenas*, as is the case here, the defendant proffered a “great deal of speculative
15 evidence suggesting the impact that compliance with California's rest and meal break laws would
16 have on its prices, service, and routes [footnote omitted].” (*Ibid.*) The court found the evidence
17 presented highly speculative, and that it failed to persuade the court that such an impact would
18 necessarily result, or, alternatively, that it would be more than attenuated. The court explained:

19 To be sure, to comply with California break laws, [defendant] may
20 choose to adjust its routes, or slightly modify its services in the
21 ways it has suggested. But just because [defendant] may make
22 changes to its routes does not necessarily mean that California's
23 break laws have more than an “indirect, remote, or tenuous effect”
24 on these decisions. The Court has concerns that MFI's evidence
25 stretches plausibility—and the FAAAA—to suggest that nearly
26 every state law would be preempted.

27 (*Id.*)

28 AB provided no evidence at trial beyond mere speculation with regard to any impact on its
rates, routes or services. AB’s unsubstantiated arguments do not persuade the Court that
California’s meal and rest break laws have had, or will have, a more than tenuous effect upon the

¹⁶ *Cardenas*, out of the Central District of California, decided counter motions for summary judgment in July 2011.
Dilts was decided in the Southern District of California in October 2011.

1 price of AB's rates, routes or services. The evidence reflects instead an employer that claimed to
2 provide drivers with one hour per day for a "meal period." Notwithstanding the fact that
3 Plaintiffs established this employer did nothing to make that a reality, AB presented no evidence
4 at trial that the provision of this "one hour meal period" acutely interfered with its prices, routes
5 or services. To the contrary, AB instead claimed throughout the life of this case to have operated
6 its business with each driver taking a one hour meal period each day. AB has not sustained its
7 burden of proving that compliance with these state laws would have a "significant" effect on its
8 ability to market its services or rates.

9 **4. FAAAA does not preempt Plaintiffs' UCL claim**

10
11 The purpose of the UCL is "to deter future violations of the unfair trade practice statute
12 and to foreclose retention by the violator of its ill-gotten gains." (*Bank of the West v. Superior*
13 *Court* (1992) 2 Cal.4th 1254, 1267.) The UCL does not regulate market "competition," rather it
14 is used to provide additional remedies for plaintiffs bringing claims arising under other statutes or
15 at common law. The only reference in the UCL to competition is its definition of "unfair
16 competition" as "any unlawful ... act or practice ..." (Bus. & Prof. Code § 17200.) In other
17 words, the type of competition the UCL addresses is the unfair competitive advantage gained by
18 an actor because it does not follow underlying laws.¹⁷ Indeed, after a 2004 ruling in *Janik v.*
19 *Rudy, Exelrod & Zieff* (2004) 119 Cal.App.4th 930, 947, plaintiffs' counsel generally must plead
20 a claim for UCL in a lawsuit with underlying Labor Code claims or be potentially subject to a
21 malpractice suit.

22
23
24 ¹⁷ The California Supreme Court concluded in *Cortez v. Purolator Air Filtration Products Co.* ("Cortez") (2000) 23
25 Cal.4th 163, 177-78 that orders for payment of wages unlawfully withheld from an employee are also a restitutionary
26 remedy authorized by section 17203: "The employer has acquired the money to be paid by means of an unlawful
27 practice that constitutes unfair competition as defined by section 17200 ... The concept of restoration or restitution,
28 as used in the UCL, is not limited only to the return of money or property that was once in the possession of that
person. The commonly understood meaning of "restore" includes a return of property to a person from whom it was
acquired, (citation), but earned wages that are due and payable pursuant to section 200 et seq. of the Labor Code are
as much the property of the employee who has given his or her labor to the employer in exchange for that property as
is property a person surrenders through an unfair business practice. An order that earned wages be paid is therefore a
restitutionary remedy authorized by the UCL. The order is not one for payment of damages."

The equitable relief provided by the UCL is not more onerous than the remedies provided in the underlying statutes at issue in this case. At most, the UCL law extends AB's liability one additional year. (See *Cortez*, 23 Cal.4th at p. 179 finding "[a]ny action on any UCL cause of action is subject to the four-year period of limitations created by that section [emphasis in original].")

The California court of appeal in *Pac-Anchor* determined that “[w]here a cause of action is based on allegations of unlawful violations of the State’s labor and unemployment insurance laws, we see no reason to find preemption merely because the pleadings raised these issues under the UCL ...” (*Pac-Anchor*, 195 Cal.App.4th at p. 771, review granted.)

This Court agrees that the UCL does not seek to regulate motor carriers, nor does its use here relate to AB's routes, rates or services in a way that is more than remote, indirect or tenuous. Plaintiffs' underlying claims, giving rise to their ability to seek relief under the UCL, are not preempted, thus, Plaintiffs' claim under the UCL are similarly not preempted.

III. CONCLUSION

Having considered the points, evidence, and arguments submitted by both AB and the Plaintiffs, the Court hereby determines that Plaintiffs prevail as to the failure to pay all hours worked claim, failure to pay employees classified as trainees claim, meal period and rest break claim and UCL and labor code claims (causes of action one through three and six through eight). Plaintiffs do not prevail as to the overtime claim, which was dismissed (cause of action four), or the OWL claim (cause of action five). Plaintiffs' supplemental damages and restitution computation is approved. The Court rejects AB's preemption claim under the FAAAct filed on October 12, 2012.¹⁸

¹⁸ For information purposes only, the Court recognizes, *Mendez v. RL Carriers, Inc.*, C 11-2478 CW, 2012 WL 5868973 (N.D. Cal. Nov. 19, 2012) certificate of appealability denied, C 11-2478 CW, 2013 WL 1004293 (N.D. Cal. Mar. 13, 2013), in which the District Judge held that in light of the flexibility provided by California’s meal and rest break provisions, it is unlikely that those provisions would rigidly “bind” motor carriers to particular rates, routes, or services, and that, accordingly, those provisions do not “relate to” motor carrier rates, routes, or services and are not preempted by the FAAA Act.

1 Class counsel may file a motion for attorney fees and costs subsequent to the issuance of
2 this Judgment.

3 After full consideration of the evidence, and the written and oral submissions by the
4 parties, and, upon good cause showing,
5

6 **IT IS HEREBY ORDERED:**

- 7 1. The Class prevails as to causes of action one, two, three, six, seven and eight;
8 2. The Class is, therefore, entitled to recover from defendant OAKLAND PORT
9 SERVICES CORP. d/b/a AB Trucking the amounts as specifically set forth in
10 Appendix A to this Order (Appendix A was originally filed with the Court on
11 October 12, 2012, attached to the Declaration of Andrea Don, in compliance with
12 the NOID);
13 3. In total, the Class is entitled to recover from defendant OAKLAND PORT
14 SERVICES CORP. d/b/a AB Trucking the sum of **\$964,557.08** (as set forth
15 specifically in Appendix A) with interest thereon at the rate of 10% per annum
16 from the date of the entry of this judgment until paid in full.

17 **IT IS SO ORDERED.**
